

**Create image** sneakers during rain or snow to protect your shoes and keep your feet from getting wet. What make them unique is that they are bright yellow and are designed to look like duck feet with webbed toes. Not only are these practical but lots of fun. The product name is Quackers Shoe Savers. Please create a photo realistic visual, based on my uploaded sketch, of a sponsored influencer Instagram post of the Influencer showcasing Quackers in their daily life – walking in the rain having fun splashing in a puddle and not worrying about their shoes getting wet. Use this caption "Rainy days used to be a fashion disaster for me, but not anymore! 😂 Just discovered these hilarious and actually super practical Quackers Shoe Savers! Seriously, duck feet shoe covers that keep my sneakers dry AND make me smile? Yes, please! Check them out at @QuackersShoeSavers [link in bio] #QuackersPartner #RainyDayEssentials #FunnyFashion #GiftIdeas"

**Vibe Marketing with AI:**

My product idea went from sketch to photo-realistic Instagram ad and brand product ad using Google AI Studio with Gemini 2.5 Pro, Gemini 2.0 Flash Image and OpenAI ChatGPT 4.0 Image <https://aistudio.google.com> <https://openai.com/>

Please take the plastic bag out of the persons hand.
